

# Online Rubric-Based Grading Tool for STEM Exams

Dr. Sara Atwood  
Dr. Brenda Read-Daily

Engineering and Physics  
Elizabethtown College

The logo for Gradescope, featuring a stylized bar chart icon to the left of the word "gradescope" in a white, lowercase, sans-serif font, all set against a teal background.

# gradescope

- grade student submissions online in any location
- change the point value associated with a particular mistake once and apply to entire population
- quickly reference similar mistakes instead of rewriting the same comment
- retain a digital record of the student work
- return feedback digitally outside of classroom time

Developed by Graduate  
Student Teaching  
Assistants in the  
Computer Science  
Department at UC  
Berkeley in 2014.

# gradescope

Prompt

Now a start-up company in use by over 300 instructors at over 30 institutions.

Equitable

The first 5 instructors at each institution get free access to Gradescope Basic forever. All others get the first 2 terms free.

Flexible

Formative

The logo for gradescope features a stylized bar chart icon with three vertical bars of increasing height, followed by the word "gradescope" in a lowercase, white, sans-serif font. The entire logo is set against a teal background.

# gradescope

## Prompt

- Graders: reduces grading time by noting similar mistakes instead of rewriting comments
- Students: feedback is prompt

## Equitable

- Graders and students: ensures consistent grading for similar work; both parties retain a digital record of student work and feedback

## Flexible

- Graders: grade from anywhere, change point values once and apply to entire population
- Students: get feedback digitally outside of class for review on your own time, easily request regrades

## Formative

- Graders: analytics of most common errors on exam
- Students: detailed identification of topical strengths and weaknesses
